DETAILED ACTION

Upon further consideration of the claims, the Examiner respectfully submits the following restriction requirement. The previous restriction requirement mailed Aug. 15, 2003 is withdrawn.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 26-55, drawn to a method of identifying an organic non-peptide compound, classified in class 436, subclass 91.
- II. Claim 56, drawn to a method of evaluating whether an organic non-peptide compound can promote activity, classified in class 436, subclass 91.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct. Unlike the method of Group I, the method claim of Group II requires the additional step of contacting the stabilized protein with one or more macromolecules. The methods in Group I and II have different modes of operation, involve different method steps and have different effects.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

. j. 1

Application/Control Number: 09/863,976

Art Unit: 1614

Claims 26 and 56 are generic to a plurality of disclosed patentably distinct species comprising SPECIES I, organic non-peptide compounds (as described at pages 6-9, 18-31 of the specification); SPECIES II, distinct measurement methods, e.g. chromatography, etc., (as described in claims 28 and 56). Applicant is respectfully requested to elect a specific organic non-peptide compound as well as a specific method of measurement, for example spectroscopy. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
